+1 216 855 1376

I have gained many skills over my work career suitable to most warehouse jobs, but I am also always looking to expand my horizons to learn more. I care about the work that I do and am always looking to put in 110% wherever I am.

I have recently graduated from the Michigan State University Coding Boot Camp and now, I'm looking to break into that field of work. I enjoy creating, and I consider myself to be a pretty creative individual. I always like to learn and understand and give 100% no matter what I do.

The following is a link to my current React Portfolio!

Work Experience

General Merchandiser

Target - Cleveland, OH

November 2020 to Present

- At Target, I am completely in charge of my own department, making my own decisions on display location, organization of aisles, etc. I also keep my department well stocked, help guests, and notify leads/management of any issues. I am also multi-versatile, trained in several different departments like Electronics, Register, and some receiving. In a short time, I have become one of the more trusted employees at the store.

Inventory/Order Puller

Eventsource - Cleveland, OH

June 2018 to October 2020

After stepping down as a manager, I moved to the inventory department to further my skills

I pulled orders using a forklift/order picker/tow motor. I counted the items on each individual order to verify their accuracy. I then placed said order in a designated area for double counting. It sometimes requires long hours and exceptional accuracy. We also need to verify a light differences in our products because a lot of them look very similar.

I have also been trained in that area as well. At Event Source, we double counted any and all orders to make certain that the counts are accurate before being sent to the customers.

I also helped to run the Inventory department when the manager is off or on vacation.

Production Manager/Supervisor

Event Source - Valley View, OH

July 2015 to June 2018

I managed a team of 20+ employees. I was responsible for filling orders, maintaining consistent work flow, giving department tours and training any and all new employees. I was also responsible for keeping my department maintained and safe. Department Manager at Event Source required quick thinking, problem solving, scheduling and a lot of consolidation.

Production

Steel Warehouse of Ohio - Cleveland, OH

May 2015 to June 2015

Responsibilities

I worked as a part inspector. I looked out for any and all blemishes in our steel parts that were distributed to the customers. I also worked with some of the smaller cranes during my short time there.

Accomplishments

I learned the job be fast and quickly gained acceptance from my supervisor. I was given lead of the table during my shift. I was never once late during my short period, always punctual, and worked as hard as possible to get good at it.

Skills Used

Multi-tasking, quick learning, math skills, concentration, stayed clean, worked fast, hardworking and an exceptional willingness to learn the trade.

Grocery Clerk/Meat Clerk

Daves Supermarket - Cleveland, OH

March 2009 to May 2015

Responsibilities

I was trained in all departments during my 6 year employment with the company. I started out as a Grocery Clerk, handling money, customer service, etc. After a year or so, I was moved to a swiss army knife's like position, as my manager put it. I worked in Customer Service counting drawers, worked as a stocker rotating and verifying dates on current stock, worked in Dairy and Produce doing relatively the same, and was eventually shifted to Meat/Deli. In the Meat/Deli departments, I worked the counters, making sure dates were already, cutting meat per custome specifications, and dealing with people on a daily basis.

Accomplishments

They have enough faith in me to have trained me all throughout the store. I have even helped management with issues on several occasions when necessary.

Skills Used

My willingness to learn, creative thinking and initiative. I have also shown that I can be taught several different things, and can work at the position necessary at will.

Education

Certificate in Coding and Web App Development

Michigan State University

January 2022 to July 2022
